# GREENORE PORT COUNTY LOUTH

## TIDE TABLES 2017 CHART DATUM

### *Notes on tidal prediction data*

- All times are in GMT so for summer time one hour should be ***added*** to the times shown in the tables.
- Heights are given in metres and decimetres relative to ***CHART DATUM*** and should thus be added to depths shown on the Admiralty Chart of Carlingford Lough (No. 2800) to obtain available water depth.
- Chart Datum is **3.13m** below Ordnance Datum (Malin) and is approximately the level of the lowest astronomical tide.
- Please note that prevailing meteorological conditions can alter the predicted tidal times and heights, particularly during storm surges.
